

**PWM TRACK**

**NEW**

**Intelligent communications technology**

- // intelligent price sign
- // comprehensive feedback via web interface
- // automated price reporting, including time stamp
- // all data available in real time via cloud service
- // system waterproof by IP67
- // user friendly interface
- // modular system

**PWM service pack**

- // monitoring
- // analysis
- // fast response times via remote diagnostics

**Quality made in Germany**

All our development and production happens in Germany, at our head quarters in Bergneustadt. By bundling all of our expertise and technology in one spot we make sure that all our systems are perfectly integrated and working together: price displays, hardware controls and software are in tune at all times.

PWM development and production involve:

- / implementing customer designs
- / 3D construction
- / automated coating of all SMD modules
- / automated centre for profile processing
- / screen printing equipment
- / digital printing
- / punch press
- / 100% burn in test, conducted by our quality management team
- / individual digit assembly

Made in Germany

## Flexible controls & system maintenance

TRACK makes controlling your price displays flexible and easy. All displays can be adjusted via radio frequency connection or straight via cable. TRACK also opens a comprehensive feedback channel, supplying real time data via secure cloud connection.

## These are your benefits

- // system diagnostics down to every single SMD LED
- // individual digit design
- // price adjustments via web interface or direct at POS
- // pro-active maintenance
- // reduction of downtime
- // reduction of travel redundancies
- // system completely IP67 protected
- // real time status display
- // integration of cash register interfaces into control units

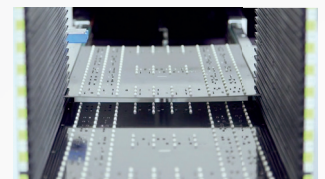

Construction & Design

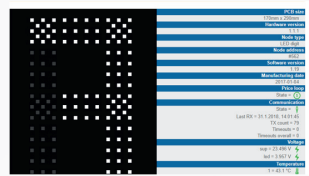

Robot applying IP67 coating

Real time access via cloud

Automated SMD LED assembly

Diagnostics down to single LEDs

Service with high-speed reaction times

## Controlling

- // price adjustments via cash register or (remote) web interface (Intranet/Internet)
- // data transfer via cable or radio connection

## TRACK is for you if:

- // are interested in intelligent control systems
- // are interested in automated processes
- // are interested in a comprehensive feedback systems
- // you run unmanned stations
- // you cover multiple stations (world wide)
- // you want to reduce service and maintenance travel
